

## **Application Profile: Ameriquest Mortgage Company**

**AEI** FASTLINKS was chosen to install a 1000Base-FX (480Mbps, full duplex capable) unlicensed RF link between the Ameriquest Mortgage's facilities in White Plains, NY. Ameriquest had run out of space and needed to expand into another office building 1 mile away. At the main site, the RF radio & antenna were mounted to a non-penetrating mount assembled in an office. At the remote site, the RF radio & antenna were mounted on the roof. By establishing a 1000Base-Fx connection between their sites, Ameriquest was able to avoid a costly, lower bandwidth (100Mbps), leased line with Verizon. As a result, the purchase of the RF link showed a payback of less than 2 years.

## **The Wireless WAN Pros!**

*FYI – Ameriquest was originally founded in 1980 as the Long Beach Savings and Loan. In 1997, it changed its name to the Ameriquest Mortgage Company and currently maintains over 250 local offices throughout the country.*
