

BigBand Networks – Redwood City, CA

Who did BigBand Networks, a leading provider of platforms for broadband multimedia services, contact to establish a GigE connection between their facilities? **AEI FASTLINKS** was asked to provide and install a 60GHz, GigE wireless link between BigBand Network's main Redwood City, CA location and the new facility they leased. The high capacity wireless link was implemented within days, and provides a physical layer 1000Base-Fx, 1000Mbps, full duplex connection.

The Wireless WAN Pros!

FYI – BigBand Networks was founded in 1999, the same year as FastLinks. Their headquarters are in Redwood City, CA and they also have offices in Latin America, Europe & Asia.
