

Application Profile: BlackRock-New York, NY

AEI FASTLINKS was chosen by Align Communications to design, install & provide ongoing support of a 1000Base-Fx free space optic (FSO) link between its client's (BlackRock) facilities in midtown Manhattan. Align Communications is a global information technology solutions technology firm, that was responsible for the infrastructure build out of BlackRock's new offices on the opposite side of 52nd street. Part of this build out involved providing a redundant, high capacity connection between the sites. The FSO link recommended by **AEI** FASTLINKS was implemented for it was the most cost-effective means for providing a 1000Base-Fx connection between sites up to 400 meters apart.

The Wireless WAN Pros!

FYI –BlackRock's mission is to be a world class provider of asset management & risk management services. It has offices in the London, Tokyo, Hong Kong, Singapore & Sydney.
