

Application Profile: Eisenhower Medical Center

AEI FASTLINKS was chosen by the Eisenhower medical Center in Rancho Mirage, CA to design and install a wireless link to connect their Outpatient Care Center with an off campus administration facility a few blocks away. They explored laying their own fiber, but due to right of way issues and the cost to lay the fiber they chose to go with a 100BaseT FSO link. The FSO link was quickly implemented and saved the Medical Center a significant amount of money.

The Wireless WAN Pros!

FYI – Dedicated in 1971, the Center is named for President Dwight D. Eisenhower, who lived part time in the area during his retirement. Buildings within the complex are also named for Bob & Dolores Hope, Betty Ford, and Barbara Sinatra.
