

FISERV – Rocky Hill, CT

AEI FASTLINKS was contracted by Sullivan & McLaughlin, a large construction firm out of Boston, MA to establish a 100Base-Fx connection between two of its client's facilities in central CT. Their client, FISERV, was in a jam, The dark fiber they had ordered from AT&T two months earlier, had yet to be installed, and they were moving personnel into a new facility down the road, in just a couple days. **AEI** FASTLINKS was first contacted on a Monday, did a site survey the following day and completed the installation of the FSO link that same week, on Friday.

The Wireless WAN Pros!

FYI – FISERV was founded in 1984, as a provider of financial service data for small banks and thrifts. In 1986, it went public as a \$70 million regional processor and currently is a multi-billion global corporation.
