

Application Profile: Johnson Press – Rockford, IL

The JLN Consulting group contacted **AEI** FASTLINKS after seeing its exhibit at the N+I show in Las Vegas. JLN's representatives were at the show looking for a high capacity wireless system for its client, hc Johnson Press. Johnson Press had 3 facilities spread out through an industrial park that needed connectivity. They had a low speed, 802.11 wireless WAN in place that was unable to accommodate their need for increased data traffic between sites. **AEI** designed and helped implement a pair of 100Mbps, full duplex FSO links to do the job. The 802.11 links were left in place to provide redundancy.

The Wireless WAN Pros!

FYI – The Johnson Group (hc Johnson Press, General Litho, Johnson Graphics & Cardinal Printing) was founded in 1957 by Harry C. Johnson. It is a family owned printing enterprise with facilities in Illinois, Indiana, Iowa and Kentucky.
