

National Democratic Institute

AEI FASTLINKS was contracted by the National Democratic Institute (NDI) to design and install a dual link, GigE connection between its main office and new office across M street in downtown Washington, DC. Phase 1 was to install a 60GHz, GigE radio link, and phase 2, a GigE FSO link. Within days of receiving an order from NDI, **AEI** was on-site and had the radio link operational, with phase 2 of the project pending. Once the dual link installation is completed, NDI will have a redundant, GigE connection that was implemented for under \$50,000.

The Wireless WAN Pros!

FYI –The National Democratic Institute for International Affairs is a nonprofit organization working to strengthen and expand democracy worldwide. Calling on a global network of volunteer experts, NDI works to build political and civic organizations, safeguard elections, and to promote citizen participation, openness and accountability in government.
