

R/Greenburg Associates – New York, NY

R/GA needed more space, so they decided to expand into a building across the street from their HQ on West 39th Street in New York City. The problem they had was they needed a high capacity (1000Mbps) connection between their sites for data transfers. Since dark fiber was not an option and leasing a GigE circuit was too costly, they turned to **AEI** who designed and installed a license-free GigE radio link for under \$25,000.

The Wireless WAN Pros!

FYI – R/GA was founded in 1977 as a 2-D graphic animation company. In 1979 it opened a feature film production company that was involved in the development and production of feature films such as Alien, Ghandi, Ghostbusters, The Untouchables and Predator.
